

Press News Release

Global Industrial growth over the past 50 years has been accompanied by accelerated environmental decline. Resulting in Global warming and all health hazards.

Gujarat State Fertilizer Corporation of India Ltd.(GSFC), has taken a new strategic initiative to develop Safe and green environment for their employee, state and our country. GSFC taken a bold step towards Environment and safety for our society. GSFC created a mile stone to start using Bio-degradable product by replacing use of Diesel for degreasing & cleaning of plant & Machinery.

GSFC has taken lead, to become first company to codify exclusively "Magic 555" a Bio-degradable product, non-toxic, non-hazardous, non-flammable, multi use application, protects human health and the environment, concentrated degreasing and cleaning agent for their GSFC, Vadodara Unit. They are leaders to start saving our Countries Energy resources & Central Gov't subsidiary. compared to other conventional harmful solvent products and services.

GSFC believe that Bio-degradable Degreasing & Cleaning product can create value, benefits and quality cleaning services and this realization can lead to improve profitability in many ways. Using environmentally friendly degreasing and cleaning product can be a good way to distinguish GSFC from other industries and excel from them. Common belief that environmentally preferable products are overpriced and less effective than conventional degreasing & cleaning products. GSFC proven that "Magic 555", certified by Green Seal & USDA approved, OSHA- EPA compliant can do the job cost effectively. GSFC considered the health benefits of their employees cleaning with environmentally preferable products. GSFC using "Magic 555" it can Improve Air quality, conserving natural resources, enhancing and protecting environment, improving employee productivity and satisfaction, optimizing life-cycle performance of infrastructure, contributing to the health and well-being of the society. It use also saves Insurance coverage cost of their employee and also in storage insurance and space being Non Hazardous and concentrated.

Enviroclean Technologies Pvt. Ltd. a Indian 100% subsidiary company of P&D Creative Co., Inc., USA. Manufacturer of "Magic 555", is committed to develop a better solution for identifying and providing environmentally friendly products to their customers. Goal of the Company is simple, to offer their customer a range of products that allow them to maintain a healthy workplace reduce air and water pollution waste, and assist in the prevention of ozone depletion. Enviroclean Technologies Pvt. Ltd. also want to make sure it is as easy as possible for their customers to learn, find, and replace with 100% Bio-degradable & eco-friendly products."

EnviroClean Technologies Pvt. Ltd., started in year 2006, in the past two year company puts lot of efforts to create awareness in the market/Industries about benefits of using Bio-degradable product & unsafe to environment and human being conventional product like Diesel, K-sin, petrol etc.. In this journey, company like supported & accepted GSFC, ONGC, GACL, KSRTC(Karnataka State Road Transport Corporation), South Western Railway, JK Tyres, Nuclear Power Corp. of India Ltd. All those company's fully or partially shifted to "Magic 555" 100% Bio-degradable and Environmental Safe Product for Degreasing & cleaning.
